the chapter by the nature of the )  
programs supported by the NUSF. ) Entered: June 28, 2011

BY THE COMMISSION:

On February 26, 2008, the Commission opened this docket seeking comment on proposed rule and regulation amendments in Title 291, Chapter 10, the Nebraska Universal Service Fund Rules and Regulations. Comments were filed by interested persons on April 28, 2008. On June 19, 2008 a workshop was held to discuss the proposed rule amendments. A number of interested parties attended the workshop and the proposed rules and comments were discussed. On August 18, 2008, the Commission released an order revising the proposed amendments, seeking comment and scheduling a hearing. On October 29, 2008, after due notice to the public, the Commission held a hearing on the proposed rule amendments.

Based on the written comments and testimony, the Commission hereby enters this order revising in part the proposed rule amendments and seeking further comment. The Commission also schedules a hearing on the proposed rule amendments.

This order generally discusses revisions to the proposed rules; however, some minor revisions may have been made which are not discussed in this order. The minor revisions were grammatical in nature or intended to provide greater clarity to the proposed rules. The revised version of the proposed rule amendments are attached to this order.

### Definitions:

The Commission previously revised in part certain definitions as discussed in its Order released on August 18, 2008. No substantive definitional changes have been made since that time.

### Collection of the NUSF Surcharge:

A number of commenters expressed concern regarding the proposed changes to section 2.01. Upon consideration of the comments and suggestions at the hearing, the Commission proposes to make the revisions reflected in the attached Appendix. Interested persons are invited to comment on the proposed change which closely resembles

section 2.01 as it currently exists in the Commissions rules with slight modification. Commenters are also free to suggest alternative revisions.

Remittances:

Although some companies expressed concerns generally with the burdens associated with Commission remittance audit requirements, there were no specific concerns about the proposed rule amendments. The proposed rules reflect current Commission procedures and requirements which were subject to multiple rounds of comments in another proceeding. The Commission is not inclined to change the remittance audit requirements or the frequency of audits at this time. Accordingly, no further changes were made as a result of the comments or testimony at the hearing.

In addition, changes were made to proposed rule 003.04 which relates to true-ups of remittance information. The proposed changes reflect the manner in which the Department currently requires carriers to handle revisions or adjustments to NUSF remittances.

Payments:

Several commenters had concerns about proposed rule 004.02I regarding the NUSF Director's ability to withhold NUSF support. The Commission made a slight change to this rule which makes it clear that such action can only be taken at direction of the Commission.

Several commenters also expressed concerns about proposed rule 4.08C. In response we had proposed some limiting language. Some commenters requested that the Commission add language indicating the NUSF cannot make "material" adjustments to NUSF support. We are hesitant to include such language such as "material" or "significant" to these rules as such language would create ambiguity and would be subject to interpretation on a case-by-case basis. An audit point or a corrected revised NUSF-EARN Form filing could cause a company's NUSF support amount to be materially changed. The Commission staff must have the flexibility to make corrections to payment calculations due to an audit or revised NUSF-EARN Form filing at a time which would be administratively efficient.

In addition, the proposed rule makes clear that any changes to NUSF payments must be made in accordance with Commission decisions. For example, the NUSF Director could not make changes to the manner in which the Support Allocation Methodology (SAM) calculates NUSF high-cost support because such changes would require a Commission decision.

The Commission emphasizes that the adoption of the proposed rule would not effectuate a change in any existing Commission practice or policy. Some commenters suggested that certain notice requirements be

placed into the rules which would precede any change the NUSF Director would make. Generally, the Department is in communication with the companies prior to any change and such companies are informed in advance of the date of any change. The Commission does not believe that a formal notice requirement should be embedded in the rules. While the Commission recognizes that the commenters have concerns with this language, the Commission believes that the concerns are not justified by any past NUSF Director action. The Commission accordingly has not proposed any further amendments to this rule.

Wireless Program:

Some commenters suggested that the Commission codify additional requirements for the Dedicated Wireless Fund Program. The Dedicated Wireless Fund Program has evolved as the Commission determines the need for wireless support. It may be necessary to make further adjustments to the Dedicated Wireless Fund Program requirements or conditions to meet the needs of consumers. The Commission requires the flexibility to make such adjustments in an order or as conditions of Dedicated Wireless Fund support. Accordingly, Commission declines to make any additional changes to its proposed rule amendments in this section at this time.

Nebraska Telephone Assistance Program (NTAP):

No substantive rule amendments were made to the NTAP section of the rules since the last comment and hearing cycle.

Comment Cycle:

The Commission releases the revised rule amendments which are attached hereto as Appendix and fully incorporated herein for public comment. Commenters shall file one (1) original, eight (8) paper copies and one (1) electronic copy in Word format with the Commission on or before **3:00 p.m. on July 29, 2011**.
